| to the Maritime Service                                                              | 16 |
| Schedule V (Refer to Section 9) - Ultra High Frequency Allocations for Operations    |    |
| on Board a Ship Station                                                              | 17 |
| Schedule VI (Refer to Section 6.4) - Radio Apparatus Power Limitations in the        |    |
| Maritime Service                                                                     | 18 |
| Schedule VII (Refer to Section 7.2) - Radio Apparatus Power Limitations in the       |    |
| Maritime Service for Specific MF and HF Frequencies                                  | 18 |
| Schedule VIII (Refer to Section 10.1) - Allocated HF Radiotelegraphy Frequencies for |    |
| Mobile Stations in the Maritime Service                                              | 19 |

#### 1. Scope

These are the technical requirements for the operation of mobile stations in the maritime service.

#### 2. Definition

For the purpose of these requirements,

*ship station* means a mobile station, including a hand-held radio, that is installed or operated on board a ship or vessel; and

coast station means a fixed station that operates in the maritime service.

### 3. Use of Approved Radio Apparatus

The operator of a ship station shall operate radio apparatus that meets applicable standards.

#### 4. Identification

The operator of a ship station shall identify the station using:

- (a) the call sign assigned by Industry Canada for that station if the radio station is licensed; or
- (b) the name of the ship or vessel; or
- (c) the Maritime Mobile Service Identities (MMSI) number with automated Digital Selective Calling (DSC).

#### 5. Radionavigation Frequencies Allocated to the Maritime Service

The operator of a ship station shall operate radionavigation apparatus on those radio frequencies within the frequency bands set out in Column I of Schedule IV.

### 6. MF/HF Frequency Bands for Communications with Coast Stations and Other Ship Stations in the Maritime Service

#### **6.1** Frequency Bands of Operation

The operator of a ship station shall operate within the frequency bands set out in Column I of Schedule II for ship-to-shore and ship-to-ship communications.

#### **6.2** Frequency Usage

The operator of a ship station shall operate the radio apparatus in accordance with the usage set out in Column II of Schedule IV for the frequency band set out in Column I for that corresponding item.

#### **6.3** Frequency Restrictions

- 6.3.1 The operator of a ship station shall operate the radio apparatus in accordance with the restrictions set out in Column III of Schedule IV for the frequency band set out in Column I for that corresponding item.
- 6.3.2 For the purpose of complying with the applicable restrictions in paragraph 6.3.1,
  - (a) *Primary* means that a station operating in the maritime service can claim protection from harmful interference from a station performing a secondary service in that band.
  - (b) Secondary means that a station operating in the maritime service shall not:
    - (i) cause harmful interference to a station performing a primary or co-primary service; or
    - (ii) claim protection from a station performing a primary or co-primary service.
  - (c) *Co-primary* means that a station operating in the maritime service can claim protection from harmful interference from a station performing a secondary service in that band, and shall not cause harmful interference to a station performing another co-primary service.

#### **Radio Apparatus Power Limitations in the Maritime Service**

Subject to Section 9.2, the operator of a ship station operating within the frequency band set out in Column I of Schedule VI shall restrict the power output to that set out in Column II of that corresponding item.

- 7. Designated Frequencies, Maximum Power Output and Usage for the MF and HF Radiotelephony Allocations for Mobile Stations in the Maritime Service
- 7.1 Assigned Frequencies and Usage for the MF and HF Radiotelephony Allocations for Mobile Stations in the Maritime Service

The operator of a ship station shall operate the radio apparatus only on the designated radio frequencies set out in Column I of Schedule III.

### 7.2 Radio Apparatus Power Limitations in the Maritime Service for Specific MF and HF Frequencies

The operator of a ship station operating on a frequency in Column I of an item in Schedule VII shall restrict the power output to that set out in Column II of that item.

### 8. Frequencies, Nature of Service, Type of Traffic and Areas of Operation with Restrictions for the VHF Band in the Maritime Service

#### 8.1 Channel and Frequencies

The operator of a ship station operating on a channel designation in Column I of Schedule I shall operate only on the transmit and receive frequencies listed in Column II.

#### 8.2 Restrictions

For each channel, the operator of the ship station shall operate in accordance with:

- (a) the area of operation (see the legend for Schedule I) identified by the placement of an "X" in Column III;
- (b) the type of traffic (see the legend for Schedule I) listed in Column IV; and
- (c) the restrictions noted in Column V.

#### **8.3** Power Restrictions

The operator of a ship station shall limit the power output to 25 watts for radio apparatus operating on the radio frequencies set out in Schedule I. While in port, to minimize interference to other users, operators shall reduce their power to 1 watt in accordance with the provisions of the VHF Radiotelephone Practices and Procedures Regulations made pursuant to the Canada Shipping Act.

### 9. Ultra High Frequency Allocations for Operations On Board a Ship Station

#### 9.1 Frequencies of Operation

The operator of a ship station shall operate only on those radio frequencies set out in Column I of Schedule V.

#### 9.2 Power Restrictions

The operator of a ship station shall limit the power output to 5 watts effective radiated power for radio apparatus operating on the radio frequencies set out in Schedule V.

#### 9.3 Operating Restrictions

The operator of the ship station operating on the radio frequencies set out in Schedule V shall operate on a no-interference, no-protection basis. These frequencies are to be used for internal communication purposes, on board Canadian ships only, which are necessary for the support of operational requirements of the ships' business.

# 10. Frequencies Allocated to Ship Radiotelegraphy Stations Using Manual or Automatic A1AAN Morse in the Exclusive Maritime Mobile Bands Between 4 and 25 MHz

The operator of a ship station shall operate the radio apparatus only on the designated radio frequencies set out in Columns I and II of Schedule VIII.

# Schedule I (Refer to Section 8) - Frequencies, Nature of Service, Type of Traffic and Area of Operation with Restrictions for the VHF Band in the Maritime Service

**Note 1:** Please refer to the Canadian Coast Guard publication *Radio Aids to Marine Navigation* (RAMN), for channels (frequencies) appropriate to your area of operation.

**Note 2:** For International Channel Designators please refer to Appendix 18 of the ITU *Radio Regulations*.

#### Legend (Schedule I)

#### **Area of Operation:**

AA: All Areas

EC (East Coast): NL, AC, GL and Eastern Arctic areas

NL: Newfoundland and Labrador

AC: Atlantic Coast, Gulf and St. Lawrence River up to and including Montréal

GL: Great Lakes (including St. Lawrence above Montréal)

WC (West Coast): BCC, Western Arctic and Athabasca-Mackenzie Watershed areas

BCC: British Columbia Coast (Pacific Coast)
INLD BC: Inland Waters of BC and the Yukon
INLD PRA: Inland Waters of MB, SK, and AB

#### **Nature of Service & Type of Traffic:**

IS: IntershipSS: Ship/shoreC: CommercialNC: Non-commercial

S: Safety

SM: Ship movement

PC: Public correspondence

AIS: Automatic Ship Identification and Surveillance System.

VTS: Vessel Traffic Services

#### **Channel Designations Explanation:**

For example:

Designated ship station **Channel 01** transmits on 156.050 MHz and receives on 160.650 MHz, and is a **duplex** channel; and

Designated ship station **Channel 06** transmits on 156.300 MHz and receives on 156.300 MHz, and is a **Simplex** channel; and

Designated ship station channels with the "A" extension such as **Channel 04A** are generally **simplex** channels; however,

Designated ship station Channels 87B and 88B are simplex channels and for AIS purposes only; while designated ship station Channels 21B, 23B, 25B, 28B, 83B, WX1, WX2 and WX3 are receive only channels for weather information.

# Schedule II (Refer to Section 6) - MF/HF Bands for Communications with Coast Stations and Other Ship Stations in the Maritime Service

| 64   | 22166.4                        | Ship/shore and intership communications                                  |
| 65   | 22169.4                        | Ship/shore and intership communications                                  |
| 66   | 22172.4                        | Ship/shore and intership communications                                  |
| 67   | 22 175.4                       | Ship/shore and intership communications                                  |

|      | Column I                       | Column II                               |
|------|--------------------------------|-----------------------------------------|
| Item | Assigned<br>Frequency<br>(kHz) | Usage                                   |
| 68   | 22178.4                        | Ship/shore and intership communications |
| 69   | 25098.4                        | Distress and safety calling             |
| 70   | 25101.4                        | Ship/shore and intership communications |
| 71   | 25104.4                        | Ship/shore and intership communications |
| 72   | 25107.4                        | Ship/shore and intership communications |
| 73   | 25110.4                        | Ship/shore and intership communications |
| 74   | 25113.4                        | Ship/shore and intership communications |
| 75   | 25116.4                        | Ship/shore and intership communications |
| 76   | 25119.4                        | Ship/shore and intership communications |

- **Note 1:** Refer to Schedule VI for power limitations.
- **Note 2:** Refer to Schedule VII for specific frequency power limitations.
- **Note 3:** Assigned frequency is 1.4 kHz higher than the carrier frequency; for example (carrier frequency of 4125.0 kHz + 1.4 kHz = 4126.4 kHz, which is the assigned frequency).
- **Note 4:** These frequencies are for simplex operation. However, they can be used for duplex operation by referring to the ITU *Radio Regulations*, Appendix 17, Part B, sub-sections A, B, C-1 and C-2.

# Schedule IV (Refer to Section 5) - Radionavigation Frequencies Allocated to the Maritime Service

|      | Column I                | Column II                                                            | Column III   |
|------|-------------------------|----------------------------------------------------------------------|--------------|
| Item | Frequency<br>Band (MHz) | Usage                                                                | Restrictions |
| 1    | .009014                 | (Formerly OMEGA)                                                     | NONE         |
| 2    | .01401995               | COMMUNICATIONS (Narrow band modes)                                   | NONE         |
| 3    | .02005070               | COMMUNICATIONS (Narrow band modes)                                   | NONE         |
| 4    | .070090                 | COMMUNICATIONS (Narrow band modes)                                   | NONE         |
| 5    | .090110                 | LORAN                                                                | NONE         |
| 6    | .110130                 | COMMUNICATIONS                                                       | NONE         |
| 7    | .130160                 | COMMUNICATIONS                                                       | NONE         |
| 8    | .285315                 | Automatic Direction Finding and Digital<br>Global Positioning System | NONE         |
| 9    | .315325                 | Automatic Direction Finding and Digital<br>Global Positioning System | NONE         |
| 10   | .325335                 | Automatic Direction Finding                                          | NONE         |
| 11   | .405415                 | RADIO DIRECTION FINDING                                              | NONE         |

### Schedule V (Refer to Section 9) - Ultra High Frequency Allocations for Operations on Board a Ship Station

| Item | Column I<br>Frequency (MHz) | Column II<br>Type of Use     |
|------|-----------------------------|------------------------------|
| 1    | 457.525                     | COMMUNICATIONS ON BOARD SHIP |
| 2    | 457.55                      | COMMUNICATIONS ON BOARD SHIP |
| 3    | 457.575                     | COMMUNICATIONS ON BOARD SHIP |
| 4    | 457.6                       | COMMUNICATIONS ON BOARD SHIP |
| 5    | 467.525                     | COMMUNICATIONS ON BOARD SHIP |
| 6    | 467.55                      | COMMUNICATIONS ON BOARD SHIP |
| 7    | 467.575                     | COMMUNICATIONS ON BOARD SHIP |
| 8    | 467.75                      | COMMUNICATIONS ON BOARD SHIP |
| 9    | 467.775                     | COMMUNICATIONS ON BOARD SHIP |
| 10   | 467.8                       | COMMUNICATIONS ON BOARD SHIP |
| 11   | 467.825                     | COMMUNICATIONS ON BOARD SHIP |

**Note:** These frequencies are to be used for **internal communication purposes only**, which are necessary for the support of operational requirements of the ship's business.

**Note:** Power output is limited to 5 watts on these frequencies.

# Schedule VI (Refer to Section 6.4) - Radio Apparatus Power Limitations in the Maritime Service

| Item | Column I<br>Frequency Bands | Column II                           |
|------|-----------------------------|-------------------------------------|
|      | (MHz)                       | Power Limitations                   |
| 1    | 2.065 - 2.850               | 1.0 kilowatts (Peak Envelope Power) |
| 2    | 4.000 - 4.438               | 1.5 kilowatts (Peak Envelope Power) |
| 3    | 6.200 - 6.525               | 1.5 kilowatts (Peak Envelope Power) |
| 4    | 8.100 - 8.815               | 1.5 kilowatts (Peak Envelope Power) |
| 5    | 12.230 - 13.200             | 1.5 kilowatts (Peak Envelope Power) |
| 6    | 16.360 - 17.410             | 1.5 kilowatts (Peak Envelope Power) |
| 7    | 18.780 - 19.900             | 1.5 kilowatts (Peak Envelope Power) |
| 8    | 22.000 - 22.855             | 1.5 kilowatts (Peak Envelope Power) |
| 9    | 25.070 - 26.275             | 1.5 kilowatts (Peak Envelope Power) |

# Schedule VII (Refer to Section 7.2) - Radio Apparatus Power Limitations in the Maritime Service for Specific MF and HF Frequencies

| Item | Column I                    | Column II                                   |
|------|-----------------------------|---------------------------------------------|
|      | Assigned<br>Frequency (kHz) | Maximum Power Peak Envelope Power<br>Output |
| 1    | 2 066.4                     | 150 watts                                   |
| 2    | 2 080.4                     | 150 watts                                   |
| 3    | 2 083.4                     | 150 watts                                   |
| 4    | 2 094.4                     | 150 watts                                   |
| 5    | 4 418.4                     | 1 kW                                        |
| 6    | 6 216.4                     | 1 kW                                        |
| 7    | 6 517.4                     | 1 kW                                        |

### Schedule VIII (Refer to Section 10.1) - Allocated HF Radiotelegraphy Frequencies for Mobile Stations in the Maritime Service

| Item | Column I                                                                                                   | Column II                                                                                                                                                            |
|------|------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|      | Working Frequency Bands (kHz)                                                                              | Calling/Replying Frequency Bands (kHz)                                                                                                                               |
| 1    | 4187 - 4202 kHz, 31 frequencies, spaced 0.5 kHz                                                            | 4182 - 4186.5 kHz, 10 frequencies, spaced 0.5 kHz<br>Group 1: 4182 and 4182.5 kHz<br>Common Channels: 4184 and 4184.5 kHz<br>Group 3: 4185 and 4185.5 kHz            |
| 2    | 6285 - 6300 kHz, 31 frequencies, spaced 0.5 kHz                                                            | 6276 - 6280.5 kHz, 10 frequencies, spaced 0.5 kHz<br>Group 1: 6277 and 6277.5 kHz<br>Common Channels: 6276 and 6276.5 kHz<br>Group 3: 6279 and 6279.5 kHz            |
